## Personal Profile

Front-End Developer with a strong foundation in Artificial Intelligence and Data Science. Experienced in building responsive, user-centered interfaces and translating ideas into functional web applications. Interested in developing scalable web applications and integrating intelligent systems with modern UI technologies.

## Education

### B.Tech in Artificial Intelligence and Data Science

2024 – 2028

Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College

CGPA: 7.82

### Higher Secondary Education (Computer Science)

2021 – 2024

Best Matriculation Higher Secondary School

• 12th Marks: 509 / 600

• 10th Marks: 386 / 500

## Experience

### Front-End Developer

2025 – Present

Vyphera Groups

- Developed responsive web interfaces using HTML, CSS, and JavaScript to enhance user experience across desktop and mobile devices.
- Collaborated with backend developers to integrate REST APIs and enable seamless data communication between frontend and backend systems.
- Optimized UI performance and improved cross-browser compatibility for production-level web applications.

### Computer Vision Intern

Dec 2025 – Jan 2026

NSIC – National Small Industries Corporation

- Implemented computer vision techniques using Python for image processing and visual data analysis.
- Developed prototype vision-based solutions using libraries such as OpenCV for real-world datasets.
- Analyzed image datasets to extract meaningful features and improve model performance.

## Projects

### Smart Expense Visualizer with Machine Learning Insights

- Developed an AI-powered expense tracking application using Python and Streamlit
- Implemented data visualization dashboards to present financial insights through charts and graphs.
- Built automated alerts for overspending detection based on predefined expense thresholds.

### IPL Mock Auction System (Web)

- Developed a web-based IPL-style auction simulator using HTML, CSS, and JavaScript.
- Implemented dynamic bidding logic and real-time player auction workflows.
- Designed an interactive interface for managing teams, players, and bidding operations.

## Skills

**Programming Languages:** Python, Java, C

**Frontend Development:** HTML, CSS, JavaScript, Flutter

**Frameworks & Tools:** React, Tailwind CSS, Streamlit, VS Code, Git, Figma

**Technologies:** Web Application Development, Data Visualization, Machine Learning Basics

## Achievements

- Secured **First Prize** at the **24-Hour National Level Vibe Coding Hackathon** (Jaipur, Rajasthan) for developing **StudX**, an EdTech platform; received a cash prize of **25,000**.

## Certifications

- Google Gemini Certified Student
- IBM Artificial Intelligence Essentials
- NPTEL Programming in Java

## Languages

- Tamil (Native)
- English (Professional Working Proficiency)
